LEPTOSPIROSIS IN YUGOSLAVIA

The following is a Yugoslav summary of a paper given by Dr Fran Mihaljevic
 at the FPRY Medical Congress held at Belgrade, 6 - 10 October 1948.

Chief elements in diagnosis: anamnesis, clinical tests, microbiological
 and serological tests. Evaluation of these elements. General and specific
 symptomatology of leptospirosis.

Course of the disease, various features. Various "morbidity entities" of
 leptospirosis. Stresses importance of special laboratories and specially
 trained personnel to determine exact extent of this disease in Yugoslavia.
 Cooperation with veterinarians required.
